

Multi-Family Case Study: Re-Piping and Custom Plumbing Winter 2024

The Problem:

Increased usage on a main cold water line that feeds a boiler room due to an underground leak on the domestic hot water return line.

The Solution:

Water Management's Master Plumbers performed a series of isolation tests to pinpoint the location of the leak and facilitated digging and repiping of the line.

Project by the Numbers

Project Cost	\$4,400
Project Duration	3 Days
Payback Period	Less than 1 Month
Annual Savings (\$)	\$250,000
Annual Savings (gallons)	10,500,000
